

Tide Pool School

***Saturday May 19, 2018
Cattle Point***

1 to 2:30 pm

The 0.1m low tide at **Cattle Point** provides an opportunity for **your family** to view an amazing diversity of creatures in the tide pools. Tread softly on the rocks and barnacles to find **anemones, fish and crabs** and use our **nets and containers** to catch them. Watch them move in the water and interact. Biologists and local identification guides will help you to identify the

creatures you collect. Afterwards, release the animals back into their habitat.

Please wear **water shoes** or **rubber boots**.

Bring your lunch at noon.

Donations to FOUP appreciated.
